Addendum to 2021 Vegetarian Society Vegetarian and Vegan Certification

Capsules & Health Ingredients

As per the Trade Mark License Agreement between Lonza and the Vegetarian Society of the United Kingdom Limited, the following Capsugel® products are covered by the 2021 Vegetarian Society certification.

- Capsugel® DRcaps® Capsules
- Capsugel® Plantcaps® Capsules
- Capsugel® Vcaps® Capsules
- Capsugel® Vcaps® Gen C Capsules
- Capsugel® Vcaps® Plus Capsules

These transparent and colored empty capsules are vegetarian and vegan certified. Empty capsules containing the colorant carmine are not certified. Imprinted capsules are certified if they are imprinted with shellac-free ink.

Statement on Kosher certification

Capsugel® capsule products

Regarding the Kosher certification of empty Capsugel® capsules produced by Capsugel France SAS, the following applies:

All Capsugel® empty capsules (gelatin capsules, Vcaps®, Vcaps® Plus and DRcaps™) are Kosher certified by the "Ko" organisation, including standard gelatin and porcine gelatin and this based on the following:

Empty gelatin capsule of bovine and/or porcine gelatin are Kosher certified by the Ko Kosher, despite of the possible presence of porcine gelatin, based on the following:

According to Rabbi Novoseller of Ko Kosher, gelatin is not a food. At one time during its processing, when the bones and hides of animals are treated with acid during the gelatin extraction process, gelatin was not considered food. According to Jewish dietary laws, "If something is at a certain point "not a food", it cannot be non-kosher." Therefore, according to Rabbi Novoseller, gelatin is kosher, regardless of animal species and slaughter method.

For the colorant Carmine (E120), which is derived from insects, this is however not the case. As such empty capsules containing carmine either as a colorant of the empty capsules or of the imprinting ink are not Ko kosher certified.

The information contained herein corresponds to Lonza's knowledge on the subject at the date of publication and is, to the best of our knowledge, accurate. However, Lonza refuses any liability for the application and use of further processed material containing our products. Solely the manufacturer of the final product is responsible according to the relevant regulations.

Statement on HPMC/Hypromellose Origin

Capsugel® empty HPMC based capsule products

Empty Capsugel® Vcaps®, Vcaps® Plus, Vcaps® Gen C, Vcaps® Enteric and DRcaps® capsules as manufactured by Lonza are produced using the raw material hydroxypropylmethylcellulose (HPMC), also known as hypromellose.

Hypromellose is a cellulose material derived from softwood trees, mainly pine and spruce trees, which are grown and harvested from plantations in Western Europe and North America. Our HPMC suppliers confirmed that only wood pulp obtained from FSC (Forest Stewardship Council) and/or PEFC (Programme for the Endorsement of Forest Certification) certified sources is being used, thereby assuring that the trees originate from sustainable forestry.

The hypromellose sourced by Lonza complies with the compendial requirements as listed in the harmonized USP, EP, and JP monographs.

Furthermore, it complies with the purity criteria for E464 (HPMC) as defined in Commission Regulation 231/2012 laying down specifications for food additives listed in Annexes II and III to Regulation (EC) No 1333/2008.

A description of the manufacturing of the hypromellose is found in the Handbook of Pharmaceutical Excipients.

“A purified form of cellulose, obtained from cotton linters or wood pulp, is reacted with sodium hydroxide solution to produce swollen alkali cellulose which is chemically more reactive than untreated cellulose. The alkali cellulose is then treated with chloromethane and propylene oxide to produce methyl hydroxypropyl ethers of cellulose. The fibrous reaction product is then purified and ground to a fine, uniform powder or granules.”

For what concerns our natural transparent, unprinted hypromellose based capsules, no ingredients are derived from animal origin.

The information contained herein corresponds to Lonza's knowledge on the subject at the date of publication and is, to the best of our knowledge, accurate. However, Lonza refuses any liability for the application and use of further processed material containing our products. Solely the manufacturer of the final product is responsible according to the relevant regulations.
